

BRAIN STORM, IDEA LISTING AND GROUPING

Team lead
(Albin B)

Choose the best algorithm for Smart railway system

Use Python code

Create Web UI where the Online railway reservation takes place

Team Member 1
(Beautlin Panisha Malar J D)

Gather passenger's details from Web UI

Generate unique QR code for each passenger using Node-Red and display it to the Web UI

Then store the passenger's details to the Cloudant DB

Team Member 3
(Jijitha A L)

Use Python code

Check the ticket validation by scanning the QR code

Use IoT device to track the live location and display it to the Web UI

Idea Prioritization :
